Information Technology for Administration, Office of Academic Resources and Information Technology
| Thai Name: อักมาล เบ็ญหาวัน

SUMMARY

I am a Computer Technical Officer at Yala Rajabhat University with expertise in Information Systems Development, Data Analytics, Artificial Intelligence Applications, Big Data Management, and Digital Transformation in Higher Education.

My work focuses on developing digital solutions that improve organizational efficiency, service delivery, and data-driven decision-making. I have experience in software development, database systems, business intelligence, data analytics, research, and digital innovation projects within the university sector.

In addition to my university responsibilities, I actively contribute to social and educational initiatives through Muslim Friends Foundation, where I support media production, digital communication, and community development programs.

EDUCATION

Doctoral Study, Currently pursuing doctoral studies focusing on: Multidimensional Poverty Prediction Using Machine Learning and Spatial Data Based on Sustainable Livelihood Framework, Research Area: Artificial Intelligence, Data Analytics, Spatial Analysis, Poverty Studies

Yala Rajabhat University, Thailand

Thailand

Master of Science (M.Sc.) in Information Technology, Areas of Study: Information Technology, Information Systems, Data Management, Digital Technology Applications

EXPERIENCE

Computer Technical Officer (Professional Level)

Yala Rajabhat University (YRU)

Yala, Thailand

Department: Information Technology for Administration, Office of Academic Resources and Information Technology

Media Division Leader

Muslim Friends Foundation

Community and Social Contribution

- Digital Communication Support
- Educational Media Development
- Educational Programs
- Social Welfare Projects
- Health Awareness Campaigns
- Community Development Initiatives

PROJECTS

YRU Track | Work Performance Tracking System for university personnel.

- Work Logging
- KPI Tracking
- Evidence Management
- Performance Reporting

YRU Service | Digital Service Platform for internal university services.

- Online Requests
- Workflow Management
- Service Monitoring

YRU Joins | Activity Participation Management System.

- Registration
- Attendance Tracking
- Participation Reporting

YRU Big Data Initiative | University-level data integration and analytics project supporting strategic planning and decision making.
